

DR. HUKAM SINGH

Scientist 'E'

Email address: hukams@gmail.com

Field of specialization: Amber biological inclusions/ Palaeobotany/ Vertebrate Paleontology

Education:

- **M.Sc. Ph.D.** HNB Garhwal University Srinagar Garhwal Uttarakhand, India.
- **Ph.D. in Geology** 2005 from HNBGU Srinagar Garhwal Uttarakhand, India.
- **Ph.D. thesis title:** Early Tertiary vertebrate fauna from Barmer Basin, western Rajasthan, India and their palaeoenvironmental implications.
- **Thesis supervisor:** Professor R.S. Rana, HNBGU Srinagar Garhwal Uttarakhand, India.
- **Research Interest:** Multidisciplinary fields of research.
- **Research work done:** Cambay Basin (Vastan, Tarkeshwar, Mangrol, Valia) and Kutch Basin (Umarsar, Panandhro, Matanomadh lignite deposits) Gujarat and Barmer, Bikaner, Nagaur and Jaisalmer Basin Rajasthan and Darjeeling District, West Bengal.
- **Field Experience:** Covered Palaeogene Paleontology, Entomology and Palaeobotany.

Residential as well Official addresses:

- **Official address:** Birbal Sahni Institute of Palaeobotany, 53 University Road Lucknow.
- **Phone:** +91(522) 274930 (Office), **Fax:** +91(522) 2740485 (Office), **Mobile:** 9919401173.
- **Residential address:** House No. 610/1828, Keshav Nagar, Sitapur Road, Lucknow, 226021.

Research Interest:

More than 20 years research experience in the field of scientific carrier, I have covered nearly most of the field areas of Palaeontology (vertebrates, invertebrates) amber biota (plant, arthropods, insects) as well as palaeobotany (mega, macro and micro plant fossils) of the sequences associated with Rajasthan Basin (Barmer, Bikaner, Nagaur) and Cambay Basin (Tarkeshwar, Vastan, Valia and Mangrol) and recently Kutch Basin (Umarsar, Panandhro, Matanomadh (lignite deposits) Gujarat, India. I have studied the diverse Tertiary vertebrates, invertebrates, teredolite ichnofossils, amber embedded inclusions and also various mega and micro floral assemblages from different Tertiary deposits of Rajasthan and Gujarat province. I have made significant contribution to the biogeography, stratigraphy, palaeoecology, palaeoenvironment, age and phytogeography of the Tertiary sequences of these areas. In addition to the aforementioned contribution, I have to my credit, the first reporting of Dipterocarp fossil from Early Eocene of Cambay Basin, Gujarat and the discovery of dammarane type of terpanoid

compound preservation in the amber from Matasukh Lignite mine, Nagaur Basin, Rajasthan. I have reported various groups of significant amber embedded social insects (ant, bees, and termite), even spore and pollen remains recorded for the first time in amber from Cambay Basin Gujarat India and also some of the new shark fish assemblages (species) were reported first time in the Indian subcontinent in the sedimentary sequences of Cambay Basin, Gujarat and Barmer, Bikaner and Jaisalmer Basins of Rajasthan. One of the biogeographically significant contributions of my work is the finding of fossil bat record which dates back to Early Eocene. I am continuing palynological studies in Himalaya regions of Lower Siwalik in Darjeeling district also. I have been working on the multidisciplinary research in Cambay Basin which has attracted well reputed international scientists from diverse field. The contribution along with all these scientists has brought out exciting findings (ant, bee, termite, spider, mosquito, fly, bugs, scorpions, beetle, web spinners), more than 150 species and in fossil plants (leaf impression, seed, wood, spore, pollen, flowers etc) the research is still under way towards the progress of new exciting fossil findings.

- **Project area:** Presently working in the Institute project (Project no. 3.8): Analysis of Amber biota from early Palaeogene sedimentary sequences of Gujarat and Rajasthan basins: Palaeoclimatic and palaeoecological perspectives. Excluding the Institutes (In-house) Project working in Collaboration with the well reputed scientists with India, US and Germany to cover overall diverse biotic assemblages on Cambay Basin (Surat District) and Kutch Basin (Bhuj District) Gujarat as well as Rajasthan Basin (Barmer, Bikaner, Nagaur and Jaisalmer).

Awards Certificate:

- **Received most cited research paper Certificate (September 19, 2019) from the Editor** (International Journal): “**PLOS ONE**” on the investigation of ‘Bitting Midge (Diptera: Ceratopogonidae) from Cambay Amber Indicate that the Eocene Fauna of the Indian Subcontinent was not Isolated’. (Article was published in 2017).
- **Received most cited research paper Certificate (Year 2010) from the Editor** (International Journal): “**Acta Palaeontologica Polonica**” on the discovery of ‘Diverse snake fauna from the Early Eocene of Vastan Lignite mine Surat District, Gujarat, India’. (Article published 2008).

Awards Medals:

- **Awarded ‘S. N. Singh Memorial Gold Medal in the Year 2020’** from Palaeontological Society of India, Lucknow for the best scientific contribution among the paper published in the Journal Palaeontological Society of India (2019), V. 64 (2), 184-226.

- **Awarded ‘Team Medal 2018’** for high quality research work including high quality Impact Factor publications of the several research articles in Refereed Journal viz. Scientific Report PLOSONE etc. (**Impact Factor: 13 ♣**)
- **Awarded ‘Team Medal 2010’ in the year 2013** for high quality/ high Impact Factor publishing papers in Refereed Journal (**PNAS, US and New Phytologist, Fungal Biology etc.**). (**Impact Factor: 18 ♣.**)

Major International Collaboration and Research Experience:

1. Worked in National and International Collaboration with **National Geographic** team India, US and Belgium, (Year 2002 to 2007).
2. International Collaborative research on **amber** is still in excellent progress with International well repute scientists from India, US and Germany, (Year 2008 to till date, continued).
3. National Collaboration with the scientist **Wadia Institute of Himalayan Geology Dehradun, Department of Geology, Punjab University, Chandigarh, Department of Geology, IIT Bombay** and Inter institutional Scientist **BSIP, Lucknow** is still continued.

Field workshop: Attended International field workshop at Vastan Surat, Gujarat. Participated in the field workshop (17th to 19th January, 2012) and is organized by (PSI) Department of Geology, University Lucknow.

Professional Membership:

1. Life member of the '**Journal Palaeontological Society of India**' Lucknow, India.
2. Life member of the '**Journal Himalayan Geology**' Dehradun, India.
3. Life member of the '**The Palaeobotanical Society**' Lucknow, India.

- **Project work experience:** Worked as Project Fellow/Senior Research Fellow in Department of Geology, University Srinagar Garhwal, engaged in DST sponsored project on faunal investigation of Barmer District, western Rajasthan during Ph.D. Course.
- ♣ **Sponsored Project:** Working on mega DST Sponsored Project on the title: Analysis of Early Eocene Amber from Cambay and Kutch Basin, Gujarat, Western India: Palaeoecological, Environmental and Climatic Significance. It begins from 07/03/2017 to continue.

Co-Supervised two Master's Dissertation:

- [1]. Miss. Rupal Dubey M.Sc. (Tech) Semester II, Dept. of Geology BHU. Training was **three weeks** starting from 21 May, 2012.

[2]. Mr. Abhisekh Sharma, student B. Tech (Geo-Science Engg.) Semester- VI, Dept. of Petroleum Engineering and Earth Sciences, University of Petroleum and Energy Studies, Dehradun. The tenure of his training was **eight weeks** starting from 4th June, 2012.
